

Family Constellations in Denmark and Perth

Private Sessions and Weekend Groups

Transgenerational Healing

facilitated by

Ulrike Danks

The Family Constellation process is a powerful tool to bring to light unconscious and unresolved dynamics within ourselves, our families and our ancestors. It dramatically clarifies how these hidden forces impact on us as individuals in our relationships on many levels. Their effects can show themselves as painful psychological or physical disfunctions in ourselves and family members. Constellations address the causes of these dynamics and initiate the healing process of unnecessary suffering and dis-ease. They help us to re-experience the natural flow of love and life-force available within ourselves. The process reveals new, often profoundly moving insights which allow deep and lasting changes. It can give access to previously inaccessible personal resources and life-supporting rather than life-denying ways to be with ourselves, family members and other people we are connected to.

Ulrike Danks (BSc Pharm) is a certified Constellations Practitioner trained by the Human Systems Institute, USA and completed recently a Trauma Therapy training with B.Rothschild, also USA. Additionally, she attends numerous trainings with other masters of Family & System Constellations. The facilitation enables her to unite her many various professional and personal life experiences into an innovative, powerful way of working with people, who are searching for lasting peace within and without.

Ulrike also offers workshops elsewhere on invitation
